

JOINT HOUSE RULES POLICY ACKNOWLEDGMENT SHEET

Failure to know or comply with the following procedures is grounds for immediate removal from the site, perhaps permanently. All people allowed access to critical areas must review these rules and demonstrate their knowledge of the procedures most applicable to their activity on site annually.

It is vitally important that you understand the severe negative impact your actions can have on this site as a result of working inappropriately. These procedures and guidelines have been developed to clarify our quality expectations and to reduce the chance of mistakes and unintended events. Failure to comply with any procedure will result in your immediate dismissal from the site, may result in permanent loss of your access to the facility, and possible loss of business for your company.

I have been given a copy of the following documents and have read them:

- Data Center Critical Environment Work Rules
- Data Center Roof Rules
- Data Center Loading Dock Rules

I have had an opportunity to ask clarifying questions about the procedures, their reasons and their intent. I agree to follow these procedures and, to the best of my ability, I shall make every effort to avoid accidents and mistakes which result in downtime.
