Recurring charges are billed in advance of the month in which the service is provided. Any optional features and extraordinary installation costs other than recurring and nonrecurring charges may apply as described herein. Customers requesting these services may subscribe to services on a month-to-month basis, or on an individual case basis as described in Section 3.6.

3.6 Service Configurations

There are two types of service configuration over which Company's services are provided: point-to-point and multipoint service.

Point-to-Point Service connects two premises designated by the Customer, either on a directly connected basis or through a hub where multiplexing functions are performed.

3.6.2 Multipoint Service

Multipoint Services connect three or more premises designated by the Customer through a Company hub. While there is no limitation on the number of locations that may be connected through multipoint service, the quality of service may be degraded when more than three points are connected. Multipoint services may be provided where it is technically possible to provide those services. However, if the Company determines that the requested multipoint service is not feasible, the Customer will be notified and provided an opportunity to change the order within forty-five (45) days.

3.7 Service Descriptions and Technical Specifications

The Company plans to offer the following services:

3.7.1 50Mbps, 100Mbps through 1Gbps (in 100Mb increments) and 10Gbps Ethernet Service

The Company provides point-to-point Ethernet services provided between locations designated by the Customer and/or between such locations and a Company hub, through fiber optic cable owned or controlled by Company.

3.7.2 DS-1 through OC-192 Private Line service

The Company provides Private Line service designed to transport high bandwidth voice, data, and video applications that demand the full-time availability of a dedicated service. This service provides point-to-point or point to multi-point dedicated connections between two of your locations or local access to an inter-exchange carrier (IXC) point of presence (POP).

3.7.3 1 Gbps, 2.5 Gbps and 10 Gbps Wavelengths

The Company provides point-to-point Wavelength services provided between locations designated by the Customer and/or between such locations and a Company hub, through fiber optic cable owned or controlled by Company.

3.8 Rate Categories

There are six rate categories that may apply to the Company's Services.

3.8.1 Channel Terminations

The Channel Termination Rate category provides for the communications path between two premises designated by a Customer. Included as part of the Channel Termination is a standard channel interface arrangement that defines the technical characteristics associated with the type of facilities to which the Company's service is to be connected, and the type of signaling capability (if any). One Channel Termination charge applies per Customer designated premises at which the service is terminated.

3.8.2 Channel Mileage

The Channel Mileage Rate category provides for the transmission facilities between two or more premises designated by a Customer.

3.8.3 Extraordinary Charges

From time to time, Customers may request special services not addressed specifically by rate elements in this Tariff, or services to locations that may cause Company to incur extraordinary expenses not contemplated in the provision of standard service offerings. These costs include, but are not limited to:

- Additional construction costs
- Building space rental or rights-of-way costs
- Additional equipment
- Special facilities routing

In these cases, the Customer will be billed additional charges on an ICB.

3.8.4 Volume Discounts

Where the Customer subscribes to substantial volumes of the Company's services, discounts for specified dollar volumes of traffic to a specific location or aggregate dollar volumes may apply on an individual customer basis.

4 RATES AND CHARGES

4.1 Calculation of Rates

4.1.1 Rates for service are based on airline mileage between rate centers of the calling and called stations. The location of rate centers is based on information provided by Verizon Maryland, Inc. Mileage is calculated using the Vertical and Horizontal (V&H) coordinate system from the National Exchange Carriers Association Tariff F.C.C. No. 4.

4.1.2 Timing of calls begins when the call is answered at the called station. Calls originating in one time period and terminating in another time period will be billed according to the rates in effect during each portion of the call.

4.2 General Regulations

- 4.2.1 Except as specifically indicated, the rates set forth in this section are for transport services where the originating and terminating points are on Company's existing network. In all other situations, special construction charges may apply in order to connect locations to Company's network.
- 4.2.2 Services may be provided using one, or a combination of rate elements as outlined in this Tariff.

4.3 Charges for Changes to Pending Orders, Service Rearrangements and Expedite Charges

From time to time, Customers may request changes to pending orders, rearrangements to existing service, and order completion to standard intervals. In these cases, the Customer will be required to reimburse the Company for the increased expenses incurred on an ICB.

4.4 Special Construction

4.4.1 Bases for Rates and Charges

Rates and charges for special construction will be based on the costs incurred by the Company and may include (1) nonrecurring type charges; (2) recurring type charges; (3) termination liabilities; or (4) combinations thereof.

- 4.4.2 The costs referred to in Section 4.4.1 may include one or more of the following items to the extent that they are applicable:
